

59 Facts Obama Does Not Want You To Know

Obama's Ship Of State Is Sinking

There are many more facts Obama does not want you to know than the 59 listed in this article. But perhaps the biggest fact is that while President Obama's "Ship Of State" is sinking, he is furiously bailing water from the ocean into the ship. All things considered, this is an appropriate metaphor.

It's not my
fault

It would be a formidable task to document the number of times President Obama has blamed President George W. Bush for our poor economy. (See: [Obama Blames Bush For Our Financial Crisis](#)) To be clear, President Bush inherited a recession from President Clinton—not to mention at least a \$1 trillion hit on our economy from the 9/11 attacks, Katrina, and more. Yet, unlike Obama, Bush took full responsibility and refused to

blame Clinton for the “Bush Economy.”

President Reagan inherited an economy from President Carter that was, arguably, as bad as the economy Obama inherited, yet Reagan turned it into the longest peace-time continuous period of economic growth in U.S. history.

We, ultimately, hold each president responsible for the state of our economy and we should make no exception for President Obama. Our current economy is the Obama Economy—no excuses, no more blame-game. So man-up, Mr. President! Stop trying to weasel out of your responsibilities. While you tell us things like, “The private sector is doing fine.” – the truth is that it is not doing anything close to “fine.” To the contrary, our economy is on the verge of collapse! So either you are the most economically ignorant president ever or you are lying to us.

The following facts are limited to the economy, which is the major issue in this presidential campaign. Keep this in mind: Under President Obama, more Americans are now living in poverty and are receiving food stamps than at any time in our entire history. Also, the income of the average American household is now \$4,000 less than when Obama took office.

Be alarmed or be stupid

I can hear it already: "Those Right Wing nuts are spreading fear again." Listen fellow Americans, this is not about Left or Right. Please clear your brains of all rigid, ideological Mind Stink. We booted Hoover, a Republican, when we thought his policies weren't working to give Roosevelt a chance. We booted Carter, a Democrat, for the same reason to give Reagan a chance. By all fair and rational standards, Obama's policies are not working and our economy is headed for a catastrophic collapse. It is irrational to not be alarmed. And yes, it could, rationally, be called stupid.

A foolish consistency is the hobgoblin of little minds. Ralph Waldo Emerson
